**Distancing &  
Contact Tracing**

#DistancingContactTracing

# Protect your employees in pandemic situations.

Covid-19 took the world by surprise. Local governments urged organisations to rethink their HSE strategy. Social distancing and contact tracing became essential in order to keep operations running safely and in compliance with pandemic control recommendations. **Rombit Distancing and Contact Tracing** enforces preventive measures against encounters among your workforce and immediately quarantine high-risk contacts to halt the spread in your workplace.

## Social distancing

Send immediate and direct notifications to workers when they violate a predefined perimeter distance between them

## Configurable behavior

Configure the distance, time, type and intensity of the social distancing alert that works for your operations

## Reliable indoor and outdoor

Rombit's UWB technology provides the accuracy needed for reliable short distance measurements

## Multiple wear factors

Wearables are available in velcro strap, clip-on, watch band and lanyard

## Contact tracing

Keep track of all encounter alerts and identify high-risk contacts in full compliance with the most strict international privacy laws

## Contact bubbles

Define contact groups in which the alert may be exempt between its members

## Industry proven

Rombit's rugged devices have been made to withstand daily and heavy industrial use

## No installation required

All features are available out of the box
