**Evacuation
Management**

#EvacuationManagement

Take your emergency evacuation to the next level.

The immediate exit of all people in your workplace out of the facility or away from the incident area, is key to guarantee their safety during a calamity. While your evacuation plans ensure the safest and most efficient route to the muster zones, it is the ability to alert, locate and identify everyone that allows you to actively manage your evacuation. **Rombit Evacuation Management** guarantees everyone receives the evacuation warning as soon as possible and accounts for everyone in real-time.

Worker evacuation alarm

Send an individual evacuation alert to all or groups of people onsite in case of an emergency situation, wherever they are

Real-time worker localization

Real-time location tracking during the entire time of the evacuation, both outdoor and indoor, accounting for safe, onsite or missing people

Evacuee headcount

Accurate and real-time reporting on and identification of workers, safely located within your muster zones, and workers still in the field

Evacuation plan insights

Optimize the efficiency of your evacuation plan with detailed testing

Smart geo-mustering

Automatic activation of preconfigured geofence muster zones for workers to safely gather during the evacuation

Hazard zones

Protect your workers by geofencing no-go zones to keep them away from hazard areas during an incident or dangerous activities

Check-in

Individual worker feedback request made by HSEQ, the control room or the medical services to check if the worker is OK

No installation required

All features are available out of the box
